

# SOLAR ENERGY INSTALLER INTERNSHIPS

**Job Title:** Photovoltaic (Solar-Electric) Installation Technician

**Location:** Madison, WI and vicinity. Some projects may require overnight stays within a few hours of Madison (food and lodging per diem provided).

**Description:** Full Spectrum Solar, a leading Wisconsin design/build solar contractor, is currently seeking several Photovoltaic (PV) Installation Technicians for the fall (starting as soon as possible and possibly ending December 30<sup>th</sup> depending on workload). This is a great opportunity to work with experienced installers and engineers who have years of experience in the solar energy construction industry. The primary job responsibility is to install PV systems for commercial and residential sites under supervision following schematics, written instructions and verbal directions. This includes mounting PV panels on roofs, trellis and ground mount racks and installing inverters and associated electrical equipment.

**Qualifications:** Ideal position for a hands-on, mechanically inclined person with a basic knowledge of electricity. Previous solar, construction or electrical experience would be a plus. Some of the work is physically demanding. Solar modules are individually carried and positioned repeatedly on roofs. You will need to be comfortable working on roofs and ladders. A valid driver's license and transportation to jobsites is desirable, but not required.

**Hours:** Work will typically be 30 – 40 hours per week with flexibility regarding time off. We offer paid-time-off and optional health insurance and dental (with employee co-pay) starting the first of the month following hiring.

**Number of positions:** (8) Applications will be considered until all positions are filled.

**To apply:** Send resume and cover letter, with dates of availability:
