WOMEN IN SOLAR POWER

Program Overview

The SEI Women in Solar Power program is our organization's way of connecting with women, and anyone who identifies as such in a significant way, from all over the world through solar energy training, networking and mentorship opportunities, and clean energy employer / job connections. The goal of this program is to create a global network of women who are considering career pathways in the clean energy sector and to support solar professionals actively working in the industry who want to take their careers to the next level.

Women's Solar Electric Lab Week

With female-only instructors and participants, this hands-on course offers women a uniquely supportive learning environment to build their solar knowledge foundation. This course offers the same curriculum as SEI's co-ed PV201L, but is intended to further encourage participants to get ALL those solar questions answered and offer networking opportunities with each other and existing women in the solar industry.

This solar training workshop offers five days of hands-on installation practice with grid-direct systems. By working in small groups, students will put what they've learned in PV101 to the test. Students will fully install and commission a wide variety of system types before testing the system, then de-commissioning and breaking down. Students rotate between a commercial ballasted roof, two steep roofs, a ground-mount, and a pole-mount system that contain a variety of inverters, racking hardware and mounting methods. Students will learn fall protection best practices and different harness set-ups. They will learn lockout/tagout procedures to create a safe working environment and use an assortment of meters to test systems.

Online Training

SEI's online campus is a great way to learn the theory that prepares you for our annual SEI Women in Solar Power Hands-on Lab Week and Networking Event in Paonia, Colorado.

Women's Lab Week

With female-only instructors and participants, this hands-on PV201LW course offers women a uniquely supportive learning environment to build their solar knowledge foundation.

Women's Scholarships

Thanks to SEI's generous partners and donors, we are able to offer scholarships to cover tuition costs for solar training to aspiring and current solar professionals. These scholarships are here to help you achieve your solar journey goals.

Networking & Mentorship

We've launched an online portal as a hub of community building. From the SEI Women in Solar Power Online Community you can access career resources, upcoming training, scholarship info, events, and mentorship webinars.

Career Services & Employer Connections

SEI takes pride in having direct connections with many of the largest solar employers in the industry as well as the small businesses that are the lifeblood of our growing industry. Our Student Services Team can help connect you with these employers to land your first job or help you take your career to the next level with tailored training and career plans.

SEI Women in Solar - Español

SEI was one of the first solar training programs in the world to offer educational services in both English and Spanish. For decades we have leveraged this strength and helped launch thousands of careers in the U.S. and Latin America. A goal of the SEI Women in Solar Power program is to empower Spanish-speaking women during all phases of their solar career journey both domestically here in the U.S. and all over the world.

GOLD

\$50-\$100K

Serves 10-20 women with 100% scholarship coverage and career support.

Benefits:

- Logo and website link featured prominently on SEI's WISP landing page and partnership page, reaching over 196,000 people
- 1 coordinated press release announcing partnership
- 4 coordinated social media posts announcing partnership, reaching over 261,000 people
- Promotion in SEI eNewsletter, reaching over 54,000 people
- Logo on applicable training program material
- Logo featured as sponsor on all WISP webinars
- 15 minute presentation during Connection Night at WISP lab week for recruiting opportunities

SILVER

\$25-\$50K

Serves 5-10 women with 100% scholarship coverage and career support.

Benefits:

- Logo and website link featured prominently on SEI's WISP landing page and partnership page, reaching over 196,000 people
- 1 coordinated press release announcing partnership
- 2 coordinated social media posts announcing partnership, reaching over 261,000 people
- Promotion in SEI eNewsletter, reaching over 54,000 people

BRONZE

\$10-\$25K

Serves 2-5 women with 100% scholarship coverage and career support.

Benefits:

- Logo and website link featured prominently on SEI WISP landing page, reaching over 98,000 people
- 1 coordinated press release announcing partnership
- 1 coordinated social media post announcing partnership, reaching over 261,000 people
